INCIDENT NUMBER: INC1001
SHORT DESCRIPTION: Checkout latency after payments-api deploy
PRIORITY: 2
SEVERITY: 2
STATE: Closed
ASSIGNMENT GROUP: Payments SRE
ASSIGNED TO: Priya Nair
CALLER: Jordan Lee
BUSINESS SERVICE: Checkout
CONFIGURATION ITEM: payments-api-prod
OPENED AT: 2026-03-01 08:00
UPDATED AT: 2026-03-01 11:40
RESOLVED AT: 2026-03-01 11:20
CLOSED AT: 2026-03-01 11:40
DESCRIPTION:
EU customers saw checkout timeouts after the 09:00 release. Card authorization was the affected business process.
CAUSE:
Root cause: connection pool exhaustion in payments-api-prod because a leaked HTTP client held connections after the 09:00 deploy.
RESOLUTION CODE: Solved (Permanently)
RESOLUTION NOTES:
Priya Nair restarted the payments-api pool and rolled back the leaked client. Validation: checkout error rate returned to baseline and synthetic probes passed.
CLOSE NOTES:
Service restored. Customer notified.
WORK NOTES:
[2026-03-01 08:10] Priya Nair (internal): Acknowledged P2 checkout latency and started the investigation.
[2026-03-01 08:40] Priya Nair (internal): Investigation identified connection pool saturation. Progress confirmed against the 09:00 deploy.
[2026-03-01 09:30] Priya Nair (internal): Blocker: waiting on change approval to roll back the leaked HTTP client.
[2026-03-01 10:00] Priya Nair (internal): Next step: apply the rollback and watch pool metrics. Will update the caller after validation.
[2026-03-01 11:20] Priya Nair (internal): Resolved. The fix was applied and checkout was restored. Resolution communicated to the caller.
ADDITIONAL COMMENTS:
[2026-03-01 08:20] Jordan Lee (customer): Checkout is still timing out for EU customers.

INCIDENT NUMBER: INC1002
SHORT DESCRIPTION: Pricing service returned stale promotional prices
PRIORITY: 3
SEVERITY: 3
STATE: Resolved
ASSIGNMENT GROUP: Commerce Engineering
ASSIGNED TO: Sam Ortiz
CALLER: Mina Shah
BUSINESS SERVICE: Pricing
CONFIGURATION ITEM: pricing-service
OPENED AT: 2026-03-02 10:00
UPDATED AT: 2026-03-02 16:00
RESOLVED AT: 2026-03-02 15:40
CLOSED AT:
DESCRIPTION:
Storefront showed yesterday's promotional prices for about two hours.
CAUSE:
The errors were caused by a stale cache in pricing-service. The cache was not invalidated after the price file landed.
RESOLUTION CODE: Solved (Workaround)
RESOLUTION NOTES:
Sam Ortiz applied a cache flush on pricing-service and reloaded the price file. A synthetic probe was not run.
CLOSE NOTES:
Prices refreshed for the active storefronts.
WORK NOTES:
[2026-03-02 10:20] Sam Ortiz (internal): Acknowledged the stale price report and opened an investigation.
[2026-03-02 12:00] Sam Ortiz (internal): Investigation identified a cache that ignored the new price file. Progress confirmed on two nodes.
[2026-03-02 14:10] Sam Ortiz (internal): Next step: flush the cache on the remaining nodes and will update the caller.
[2026-03-02 15:40] Sam Ortiz (internal): Resolved. Prices were restored on the storefront. Resolution communicated to Mina Shah.
ADDITIONAL COMMENTS:
[2026-03-02 10:30] Mina Shah (customer): The banner price is still wrong on the EU site.

INCIDENT NUMBER: INC1003
SHORT DESCRIPTION: Mail relay delays for outbound invoices
PRIORITY: 3
SEVERITY: 3
STATE: Closed
ASSIGNMENT GROUP: Messaging
ASSIGNED TO: Alex Romero
CALLER: Casey Wu
BUSINESS SERVICE: Billing Mail
CONFIGURATION ITEM: smtp-relay-02
OPENED AT: 2026-03-03 09:00
UPDATED AT: 2026-03-04 11:00
RESOLVED AT: 2026-03-04 10:30
CLOSED AT: 2026-03-04 11:00
DESCRIPTION:
The failure occurred in the mail relay due to a timeout. Invoice mail was slow for several business hours.
CAUSE:
RESOLUTION CODE: Solved (Permanently)
RESOLUTION NOTES:
The service was restarted.
CLOSE NOTES:
Mail flow resumed.
WORK NOTES:
[2026-03-03 13:30] Alex Romero (internal): Acknowledged the delayed invoice mail and recorded that a basic investigation was open.
[2026-03-04 10:00] Alex Romero (internal): Resolved. The relay was restored after a restart.
ADDITIONAL COMMENTS:

INCIDENT NUMBER: INC1004
SHORT DESCRIPTION: Users cannot send email
PRIORITY: 3
SEVERITY: 3
STATE: Closed
ASSIGNMENT GROUP: Service Desk
ASSIGNED TO:
CALLER: Robin Patel
BUSINESS SERVICE: Email
CONFIGURATION ITEM:
OPENED AT: 2026-03-04 08:00
UPDATED AT: 2026-03-04 18:00
RESOLVED AT:
CLOSED AT: 2026-03-04 18:00
DESCRIPTION:

Users cannot send email.

CAUSE:

WORK NOTES:

ADDITIONAL COMMENTS:

INCIDENT NUMBER: INC1005

SHORT DESCRIPTION: Nightly invoice pipeline failed

PRIORITY: 2

SEVERITY: 2

STATE: Resolved

ASSIGNMENT GROUP: Data Platform

ASSIGNED TO: Noah Grant

CALLER: Finance Ops

BUSINESS SERVICE: Invoicing

CONFIGURATION ITEM: invoice-pipeline

OPENED AT: 2026-03-05 01:10

UPDATED AT: 2026-03-05 04:40

RESOLVED AT: 2026-03-05 04:20

CLOSED AT:

DESCRIPTION:

Pipeline failed.

CAUSE:

RESOLUTION CODE: Solved (Workaround)

RESOLUTION NOTES:

Noah Grant restarted the invoice-pipeline runner and requeued the batch. Validation: the batch completed and the row count returned to baseline.

CLOSE NOTES:

Finance confirmed the invoices were produced.

WORK NOTES:

[2026-03-05 01:20] Noah Grant (internal): Acknowledged the failed nightly run and started an investigation.

[2026-03-05 02:10] Noah Grant (internal): Investigation is still checking logs. Progress confirmed that the job stopped at the extract step.

[2026-03-05 03:00] Noah Grant (internal): Next step: restart the runner. Will update finance after the rerun.

[2026-03-05 04:20] Noah Grant (internal): Resolved. The batch was restored and resolution communicated to finance ops.

ADDITIONAL COMMENTS:

INCIDENT NUMBER: INC1006

SHORT DESCRIPTION: Search index lag on the catalog service

PRIORITY: 3

SEVERITY: 3

STATE: Resolved

ASSIGNMENT GROUP: Search Platform

ASSIGNED TO: Taylor Brooks

CALLER: Catalog Ops

BUSINESS SERVICE: Catalog

CONFIGURATION ITEM: catalog-index

OPENED AT: 2026-03-06 09:00

UPDATED AT: 2026-03-06 13:10

RESOLVED AT: 2026-03-06 12:50

CLOSED AT:

DESCRIPTION:

Catalog search results lagged the product database by about 40 minutes.

CAUSE:

Root cause: catalog-index consumers stalled because a poison message blocked the partition.

RESOLUTION CODE: Solved (Permanently)

RESOLUTION NOTES:

The stalled consumer was restarted and the poison message was moved aside. Validation: index lag returned to baseline and probes passed.

CLOSE NOTES:

Search results are current.

WORK NOTES:

[2026-03-06 09:15] Taylor Brooks (internal): Acknowledged catalog lag and started an investigation.

[2026-03-06 10:00] Taylor Brooks (internal): Investigation identified a stuck partition. Progress confirmed on the consumer lag graph.

[2026-03-06 11:10] Taylor Brooks (internal): Next step: move the poison message and restart the consumer. Will update catalog ops.

[2026-03-06 12:50] Taylor Brooks (internal): Resolved. Search was restored. Resolution communicated to the caller.

ADDITIONAL COMMENTS:

INCIDENT NUMBER: INC1007

SHORT DESCRIPTION: VPN gateway failover completed without a written trail

PRIORITY: 2

SEVERITY: 1

STATE: Closed

ASSIGNMENT GROUP: Network Operations

ASSIGNED TO: Elena Voss

CALLER: Region Desk

BUSINESS SERVICE: Remote Access

CONFIGURATION ITEM: vpn-gw-east

OPENED AT: 2026-03-07 07:00

UPDATED AT: 2026-03-07 09:00

RESOLVED AT: 2026-03-07 08:40

CLOSED AT: 2026-03-07 09:00

DESCRIPTION:

Remote access dropped for the east region for 20 minutes.

CAUSE:

Root cause: vpn-gw-east failed over because the primary ISP circuit flapped.

RESOLUTION CODE: Solved (Permanently)

RESOLUTION NOTES:

Elena Voss failed over the remaining sessions to vpn-gw-west and reset the primary tunnel. Validation: client reconnects returned to baseline and probes passed.

CLOSE NOTES:

Remote access was restored.

WORK NOTES:

ADDITIONAL COMMENTS:

INCIDENT NUMBER: INC1008

SHORT DESCRIPTION: Order service errors during the morning peak

PRIORITY: 2

SEVERITY: 2

STATE: Resolved

ASSIGNMENT GROUP: Order Reliability

ASSIGNED TO: Chris Dalton

CALLER: Store Ops

BUSINESS SERVICE: Orders

CONFIGURATION ITEM: order-service

OPENED AT: 2026-03-08 08:00

UPDATED AT: 2026-03-08 12:30

RESOLVED AT: 2026-03-08 12:10

CLOSED AT:

DESCRIPTION:

Orders failed during the morning peak. Two different explanations were recorded.

CAUSE:
Root cause: storage volume on order-service reached capacity.
Root cause: packet loss on the core network caused the failures.
RESOLUTION CODE: Solved (Workaround)
RESOLUTION NOTES:
Chris Dalton restarted order-service. The error rate dropped after the restart.
CLOSE NOTES:
Peak traffic subsided.
WORK NOTES:
[2026-03-08 08:12] Chris Dalton (internal): Acknowledged order failures and started an investigation.
[2026-03-08 09:00] Chris Dalton (internal): Investigation identified disk pressure. Progress confirmed on the host.
[2026-03-08 10:30] Chris Dalton (internal): Next step: restart the service. Will update store ops after the restart.
[2026-03-08 12:10] Chris Dalton (internal): Resolved. The service was restored. Resolution communicated to store ops.
ADDITIONAL COMMENTS:
